

Anschlussdose bauseits

A schematic diagram of a stirred tank reactor. It shows a cylindrical tank with a central vertical stirrer shaft. The shaft is connected to a stirrer motor located outside the tank. The stirrer has a central shaft with a central impeller and two side impellers. The tank is supported by a base with four legs. A small circle with a dot in the center is located on the top surface of the tank, representing a manhole or a sensor.
