

Cabo oval

CABO OVAL

Product number: Cabo Oval

Cabo is a wholly breathtaking freestanding bathtub, made from just a single piece of acrylic. The bathtub and panel of this model merge together seamlessly. Thanks to a new and sophisticated manufacturing process and exceptional expertise, a perfectly shaped monolith or monobloc is produced, which offers the many advantages of bathroom-quality acrylic, along with extremely high stability. Ergonomically shaped back sections are designed to provide the greatest possible comfort. The high-quality cast acrylic ensures you will feel completely relaxed. It is particularly efficient at insulating against heat loss, meaning that the surface always feels pleasantly warm on your skin. The surface finish is also remarkably smooth, non-porous and hard-wearing – it's noticeably comfortable and ensures ease of cleaning. The matching snap-shut overflow fittings and base frame are included in the scope of delivery.

Typ	Cabo Oval
Height	470
Depth	450
