

Namur oval freestanding

NAMUR OVAL FREESTANDING

Product number: Namur Oval freistehend

The oval shape is to be celebrated, and the Namur model is as if it had been custom-made to be the centre of the bathroom. The impact of this unusual shape with its particularly narrow tub rims works best as a freestanding beauty. The oval shape symbolises security, harmony and exclusivity. Choose Namur to elevate your bathroom to a highly sophisticated private sanctuary. The comfortable, skin-friendly back support which can be adjusted to your body completes the refreshing bathing experience. The matching NAMUR washbasins echo the elegant and delicate shape of the NAMUR bathtub, classically interpreting the shape in their own distinctive way, and are a perfect addition to the bathroom. The NAMUR free-standing bathtub was awarded a "Special Mention" prize in the Bath and Wellness category of the German Design Award 2016. With this award, the international jury of experts acknowledges designs that boast particularly effective features or solutions. Every single detail is carefully considered in the design of the NAMUR bathtub, and the developers at HOESCH also rely on the the highest quality material. The high-grade Solique is a type of mineral cast offering maximum resistance to wear and tear. The surface is smooth and glossy. At the same time, Solique has an almost insulating effect. The result: the bath water remains pleasantly warm for longer. Available in high gloss white and matt white.
