SHOWER CABIN NUNITY HINGED DOORS

Product number: nUnity mit Flügeltüren

nUnity is a real revolution in showering. Are you worried about choosing individual bathroom elements? Our designers have taken on this task for you and created a complete product. The complete enclosure is perfect for any bathroom. Its uniqueness lies in the detail - all elements, from the shower tray to the thermostatic mixer, are perfectly coordinated, so you don't have to assemble the components yourself. When you choose nUnity, you get everything you need to create the perfect shower environment. The shower enclosure is made of safety glass with EverClean coating. The front part of the cubicle is made of transparent glass, while the rear walls are in white. Thanks to this combination, we have the possibility to adapt the cabin to any bathroom décor. The standard shower set includes an adjustable rain and hand shower, a thermostatic mixer and a practical shelf for shower items. A shower tray made of our successful Solique material with a SoliquePro surface is the perfect complement to the nUnity shower enclosure and forms a harmonious whole with it.

Typ	nUnity mit Flügeltüren
Height	2000
