

Glas panel hexagonal

GLAS PANEL HEXAGONAL

Product number: Glasverkleidung Sechseck

Set colour accents! With this additional option, you can harmoniously round off your bathroom colour concept: with a mirror-smooth glass cladding for your bathtub. Choose your desired colour from the earth tones: Black, slate grey, telegrey, stone grey or white. Costly walling and re-walling of the baths is a thing of the past. The bathtub base frame is completely pre-assembled and the individual panes can be attached quickly, easily and securely using a magnetic system. These claddings are ideal for whirlpool tubs, as only the glass panel needs to be removed for maintenance or repairs and the whirlpool system is easily accessible.
