

Structura corner version

STRUCTURA CORNER VERSION

Product number: Structura Eckversion

The 2-meter-high Structura shower enclosure is an elegant and functional solution, creating a particularly comfortable space for daily showers. The structured glass softly diffuses light, provides subtle privacy, and gives the bathroom a modern, airy feel. The enclosure pairs perfectly with Solique mineral cast shower trays, forming a cohesive and aesthetically pleasing shower area. Thanks to the EverClean coating, which reduces limescale and dirt buildup, the glass is especially easy to maintain and remains clear for a long time. Structura combines functionality, elegance, and durability—ideal for those who value design, comfort, and effortless care.
