# WHIRLING

*feels so magical ...*

The HOESCH whirlpool systems can be easily integrated into almost every HOESCH bathtub, turning the bathroom into a private wellness area.

## **Delicate sensation**

Enjoy that feeling of  
butterflies in your tummy!

## Key facts and tips about whirling

### In what way is whirl bathing good for our health?

Whirling is healthy, especially if you enjoy it regularly:

- It cleans your skin.
  - It relaxes your muscles.
  - It massages your connective tissues.
  - It improves circulation.
  - It stimulates your metabolism.
  - It boosts the immune system.
  - It relieves the symptoms of colds.
  - It warms the body more quickly and more gently than a normal bath, because through the flow the temperature has a better effect on the body.
  - It relieves back pain and tension.
  - It calms the nerves and relaxes mind and body. Regular whirl bathing makes our everyday lives less stressful.
  - It helps our bodies regenerate themselves: minor injuries and muscular cramps heal more quickly and more efficiently.
  - Special jets allow the flow of water to be used for foot reflex zone massages.
- As in a normal bathtub: take care if you bleed easily or suffer from heart or circulatory problems.

### How does the whirl system work?

The sensuous pleasure of whirl bathing is actually derived from a really simple idea: jets in the back and sides of the whirltub pump the water into the tub. The strength of the air-water mix can be controlled precisely to allow it to be directed exactly to where it is needed. Air jets in the base of the tub release bubbles of air up through the water. The combination of these two types of jet provides you with the perfect whirling experience.

### What temperature should the water in the whirl system have? How long should one stay in the tub?

The ideal water temperature is between 36 and 38 degrees. See which temperature suits you best. Stay in the whirltub or whirlpool for around 15 to 20 minutes. But remember that whirl bathing is not something to be done in passing. Enjoy the time to yourself and leave yourself a little more time to relax after your session: read a book, snuggle up in something warm or go for a gentle stroll. Only you know what is best for you and your body.

# WHIRLTUBS

# HOESCH

Fulfill a wellness dream: your own whirlpool bath. Relax in warm, bubbling water at home whenever you like – stress-free. Simply superb! How great that almost every HOESCH brand bathtub can be equipped with an innovative whirlpool system.

# HOESCH

## Innovation whirl technology

Whirlbathing is the most tingling way to create yourself again and again. Through the combination of moist warmth and gentle massage, everyday stresses drip off you. Pain and tension are reduced and the circulation is regulated. Especially for the back, shoulders and neck there is hardly anything more beneficial. Your blood circulation is stimulated - the skin appears fresher and firmer. Your muscles are relaxed and strengthened and your soul revives. You will feel younger, more relaxed. As if reborn.

# WHIRLTUBS

The whirlpool jets in the back and side walls of the whirlpool bath are used for massage and thus for targeted relaxation of muscles in certain parts of the body. The air jets are recessed in the bottom of the tub and cover the entire surface. The rising air vitalizes the entire body and stimulates circulation. The best feel-good effect is achieved by combining both types of jets.

Innovative technology does not stop when you reach for your towel. We guarantee unbeatable hygiene through drainage of the residual water. A semiautomatic or manual disinfection system is fitted as standard. Whirl bathing with HOESCH: simply carefree.

## AIRSYSTEM iSENSI

- the sparkling champagne experience  
for Monolith iSensi bathtubs

Pleasant air flows into the water through many small jets in the bathtub floor - a dreamlike, gentle massage for the whole body.

The jets are recessed flat in the floor of the bathtub and therefore do not interfere either when sitting or lying down. The air vortex can be controlled individually. 2 colourful underwater spotlights with colour light changers provide a sensual atmosphere.

### Try it for yourself:

- 12 - 20 Air jets (depending on model)
- 2 standard LEDs with colour light changer
- control panel on the tub rim
- Fully automatic post-drying
- optionally available 4 back and 2 foot jets
- 2 additional optionally available LEDs with colour light changer

## Safety and hygiene of your HOESCH whirlpool bath

### Dry-run protection

Your HOESCH whirltub is equipped with dry-run protection. The pump, the lighting or the disinfection function can be started only when the green LED diode is on. The dry-run protection constitutes a protection against starting the system when the bathtub is empty or the water level is too low.

### Automatic switching-off of the system

The operational time of the system is limited to 25 minutes. After 25 minutes, regardless of the buttons switched on, the system switches-off automatically.

### Disinfection

Regular disinfection of your whirltub guarantees optimal hygiene. When the tub is not used for longer period of time, it is necessary to make disinfection before running the tub! In order to run disinfection, there must be certain level of water- alternatively, the water level must be raised to the required level at which it is also possible to activate underwater spotlight.

# HOESCH

## Foam baths

- Sandalwood - soothing, calming, regenerating, satisfying
- Musk - warming, stimulating, releasing
- Cajeput - energy-promoting, refreshing
- Cajeput mandarin - exhilarating, relaxing, stimulating, invigorating
- Lavender - mood-lifting, relaxing
- Lemongrass lemon balm - invigorating, refreshing, promotes concentration
- Vanilla - calming, relaxing

Foam baths for whirlpools from HOESCH are only slightly foaming and support the deep effect of the bubbling bath.
