

General care guidelines

After showering or bathing rinse out the shower tray, bathtub or washbasin surface with water and wipe with a damp cloth. Do not use any abrasive agents!

For occasional thorough cleaning apply a small amount of a cleaning liquid e.g. Hoesch Cleaner (Article No. 699900) on the surface and polish it with a soft dry cloth. Stubborn dirt can be removed with warm water and liquid and mild cleaner or with soapsuds. To remove hard water deposits, use a brandy vinegar and water (do not apply for fittings!). When using drain cleaners, follow the manufacturer's instructions!

Superficial scratches or roughened places on shiny finishes can be removed with the Hoesch Care Set (Article No. 699100, please follow the instructions!).

To remove deep scratches or burnt spots on shiny or matt surfaces, smooth over the affected areas cautiously with fine sandpaper (no. 800-1500) or a metal polisher made of very fine steel wool.

Attention! Do not grind the surface with anti-slip coating!

Do not use...

- Scouring or scraping cleaning textiles or bath sponges
- Cleaning agents with fluid acids such as hydrochloric or acetic acid
- Scouring agents
- Chlorine bleach containing cleaner

⚠ Attention! Do not grind the surface with anti-slip coating! Do not use any hair dye in shower trays with anti-slip coating.
